Quantity	Inquire
Weight	68 grams
Wireless	Yes
Detection Method	Red and Infra-Red Light Reflected Against Calculus
Power Source	2 AA Batteries
Alerts	Audible and Luminous Signal
Probe Type	Curved with Millimeter Markings For Pocket Depth
List Price	Inquire

Product Description

The new neks DetecTar mini™ objectively identifies subgingival calculus by evaluating the root surfaces and detecting differences between calculus and the tooth surface, even in the presence of contaminants. Clinical studies have demonstrated its effectiveness and superiority at detecting subgingival calculus when compared to conventional periodontal probes, regardless of the experience level of the operator.
