Product Spotlight

Colorise Thermochromic VPS Impression Material

Unique Chromatime Technology Simplifies and Saves Time on Making Impressions

Zhermack Inc, a leading producer of impression materials for dental clinicians and high-tech solutions for dental laboratories, introduces Colorise VPS Impression Material, a unique, thermochromic material designed for higher speed and definition and greater chairside productivity.

Colorise VPS Impression Material takes advantage of Zhermack's patented chromatime technology. This innovation in vinyl polysiloxane (VPS) impression material employs color change to signal to the clinician the time required for impression-making. There is no more need to watch the clock and no guessing when the impression is done. A change in the material's color is all that is needed to know that it's ready. Although any plastic or metal tray

With Colorise wash materials, a color change from green to yellow indicates the end of working time. In the heavy and monophasic viscosities, a color change from light blue to white indicates the end of the setting time.

will work with Colorise, Zhermack also offers a full line of clear plastic impression trays specifically designed for easy viewing of the color change.

Intelligent Calculus Detection

Minimally Invasive Diagnostic Aid Helps Clinicians Detect Up to 3 Times More Calculus

neks Technologies Inc launches the DetecTar *mini*, the first and only diagnostic aid to assist clinicians in the accurate detection of subgingival calculus. The minimally invasive, pain-free device, based on state-of-the-art light-emitting diode (LED) and fiber-optic technologies, detects up to 3 times more calculus than traditional periodontal probes and has been shown to reduce over-detection by 64%. The DetecTar *mini* allows for more accurate and continuous detection even in deep periodontal pockets and is unaffected by the presence of blood, saliva, or other contaminants. Hygienists can use it as a guide before scaling, as a verification tool after scaling, and to help decrease uncertainty in deep pockets.

The new DetecTar mini is an easy-to-use, lightweight (2.4 oz), cordless device. Its ergonomic, pen-size design makes it conveniently portable, allowing for easy storage and transport.

More Fun and Variety

Butler Propy Paste Expands Sunstar's Successful Crayola Dental Office Line for Kids

Building on the fun of the Crayola coloring experience, the Crayola Propy Paste Variety Pack is offered in a Crayola-themed box and includes 50 cups each of grape-, bubble gum-, and orange-flavored prophy pastes.

Sunstar Americas, Inc adds a colorful new addition to their Crayola line of oral care products for kids—Butler Crayola Propy Paste. With unique packaging and bright colors, it joins Butler's Fluoride Foam and GUM Crayola Fluoride Trays in the Crayola Dental Office line.

The Crayola Propy Paste Variety Pack includes 150 cups of fine, pumice-based paste that offers balanced polishing ingredients for excellent cleaning and polishing. The Crayola Fluoride Foam Variety Pack contains light, nonaerosol foams that provide effective delivery while flowing easily in and around each tooth to provide maximum coverage. Protect Fluoride applicator trays are colorful, hinged fluoride trays available in 3 fun colors and 2 kid sizes.
